WORK METHODOLOGY

ANALYSIS

Analysis is the first and most important step for any project. This process is initiated with discussion and a few queries to figure out the nature of the desired project and objectives. We too, analyze the design and functionality of the project that the client has visualized. Analysis helps in creating a basis for other work processes.

STRATEGY AND PLANNING

On the basis of requirements and objectives, a framework is derived and presented to the client. A detailed discussion is held to figure out if anything is to be added, improvised, or removed. Here we derive a final outline of design and functionality, develop strategy, and create work plans and schedules for mobilizing manpower and resources.

DESIGN AND DEVELOPMENT

As per the finalized strategy and plans, we proceed towards building the project. Our professional designers and developers use every possible technology to deliver 100% result.

TEST AND DEPLOYMENT

Following the design and development work, we undergo testing or observation from our side and then provide a demo copy to the client for the same purpose. This helps in figuring out any inaccuracies if present. After amending all the errors and weaknesses, if present, the deployment or delivery of the project is done.

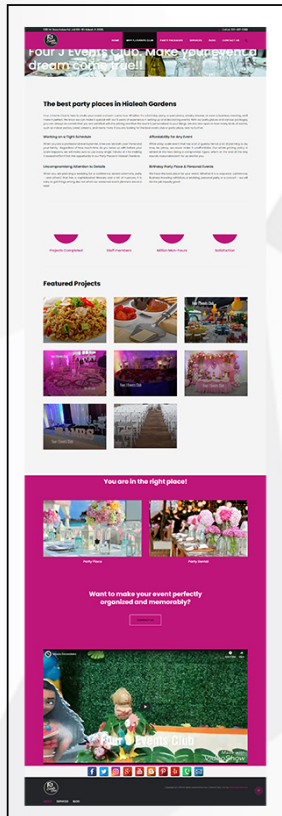

MAINTENANCE AND UPGRADE

We have a separate team of experts who provide reliable support for the maintenance and upgrade of our projects. The team works to avoid errors and breaches and ensure that the products are up-to-date with the latest technology and deliver effective and efficient output with excellent performance.

CLIENT REVIEWS

Viktorija Eftimova

1 review

★★★★★ 2 months ago

The team did very hard work on my website to rank it as better as possible, the first week immediately we noticed more organic visitors coming, and they met my expectations and much more. There was a lot of work done, a lot of social media posting, blog writing, SEO works. I strongly recommend this company for everyone that is in need of their services.

I have had a satisfactory experience with Web Brain InfoTech. I got my eCommerce website developed in Magento by them. The team has met all my expectations and they are in charge of website maintenance and Digital Marketing services. They are really professional, polite and dedicated.

I recommend Web Brain InfoTech to all who are looking for cost-effective website development and marketing services.

I got their contact from Google and called them for my website redesign work. Rahul has given a detailed presentation on it and their team provided me with extremely satisfactory services. They have done the job in 2 weeks timeframe and after they are helping with their SEO Services which is also very good.

I recommend Web Brain InfoTech to everyone for the Website services.

Amazing Company. What a piece of professionalism. Loved it truly. We have hired them SEO and Social Media works to improve our visibility in UAE and get traffic from United Arab Emirates. They have done it in just 6 months of the work. They have improved it by 200%. We are very much satisfied and recommend to you all for Digital marketing works.

Positive: Professionalism

I am very happy with their website development service. Rahul made a very good website for me. He is much confident and creative. He listened my requirement very calm and then executed the work very smoothly. I am very happy with the website, the overall look and the smoothness with which it moves. Thank you, Web Brain InfoTech and highly recommended.
